EDUCATION

Master of Information Technology
RMIT University
Apr 2023 – Jun 2025
GPA - 2.6 / 4.0

Bachelor of Science in Computing with First Class Honours
University of Greenwich
Jun 2019 – Feb 2021

SKILLS

Programming Languages
JavaScript, TypeScript, Python, C#

Frameworks & Libraries
React.js, Node.js, .NET Core, Express

Game Development
Unity (C#)

Cloud Services & DevOps
Amazon Web Services (AWS), Firebase

Databases
MySQL, PostgreSQL, DynamoDB, Firestore

Development Practices
Agile, GitHub & Version Control, Perforce, Testing, Debugging

LANGUAGES

English – Professional

Myanmar – Native

SUMMARY

Results-driven Full Stack Developer with experience building scalable, high-performance web and mobile applications across front-end and back-end environments. Skilled in React.js, TypeScript, JavaScript, Node.js, Firebase, AWS, and RESTful API development, with a strong focus on clean architecture, responsive user interfaces, and maintainable systems.

Experienced in developing user-focused digital solutions including e-commerce platforms, fitness management systems, and loyalty applications, with hands-on expertise in authentication, real-time features, payment integration, cloud services, and database-driven functionality. Strong focus on usability, performance optimization, and delivering reliable end-to-end application features.

Adaptable and collaborative, with proven ability to contribute across the full software development lifecycle, from requirements gathering and feature implementation to testing, deployment, and continuous improvement. Committed to building secure, efficient, and impactful solutions that enhance user experience and business operations.

WORK EXPERIENCE

Full Stack Developer
Voltage Training Club — Mar 2025 – Jun 2025 — South Melbourne, VIC

- Developed core modules for a **fitness management platform** using TypeScript and modern web technologies.
- Built features for **trainer qualification management, workout creation, and workout tracking**.
- Implemented **nutrition tracking functionality** to support user health and fitness monitoring.
- Integrated a **real-time chat system** to enable communication between trainers and clients.
- Connected **AWS services** to support authentication, application data flow, and cloud-based storage.
- **Tech Stack: TypeScript, React.js, Node.js, REST APIs, AWS, DynamoDB**

Web Developer
TT Web — Mar 2025 – Jun 2025 — Melbourne, VIC

- Developed the **TT Web System** to manage tutor and lab assistant job applications.
- Built responsive user interfaces using **React and modern JavaScript**.
- Implemented backend services with **Node.js, Express, and GraphQL**.
- Designed **MySQL database schemas** to store candidate applications and lecturer feedback.
- Implemented role-based access features for lecturers and administrators to review and rank applications.
- **Tech Stack: JavaScript, React.js, Node.js, Express, GraphQL, MySQL**

Full Stack Developer
Makro Myanmar — Jan 2022 – Jan 2023 — Yangon, Myanmar

- Developed and maintained the **Makro Myanmar mobile application and website**.
- Built **RESTful APIs** for product browsing, store locator services, and customer notifications.
- Integrated **AWS services** to support authentication and cloud-based data handling.
- Implemented front-end components using **React.js** to improve user experience.
- Supported customer engagement features including promotions and membership functionality.
- **Tech Stack: JavaScript, React.js, Node.js, Express, REST APIs, AWS, MySQL**

Software Developer
City Mart — Mar 2021 – Dec 2021 — Yangon, Myanmar

- Contributed to the development of **City Rewards 2.0**, a large-scale customer loyalty platform.
- Built APIs for **point tracking, voucher redemption, and user account management**.
- Enhanced the **React.js front-end** to support responsive layouts and real-time point updates.
- Implemented secure authentication workflows for customer accounts.
- Supported debugging, testing, and feature improvements to ensure system reliability.
- **Tech Stack: JavaScript, React.js, Node.js, REST APIs, Express, AWS, MySQL**

RECENT PROJECT

APM Jewellery (Visit Website)

- Developed a full-stack **jewellery e-commerce platform** with authentication, product browsing, and cart functionality.
- Built responsive user interfaces using **React** to improve product browsing and shopping experience.
- Integrated **Firebase Authentication, Firestore, and Storage** for secure user and product management.
- Implemented **Stripe payment processing** for secure checkout and order handling.
- Developed an **admin dashboard** for managing products, orders, and customer data.
- **Tech Stack: JavaScript, React.js, Node.js, REST APIs, Express, Firebase, Stripe**
